Thank you for purchasing this fine quality handcrafted keg.

Your keg is made from American Oak and is suitable for storing and ageing fortified wines and spirits. By following a few simple instructions your keg will give you many years of enjoyment.

- › Please fill this keg within two weeks of purchasing.
- › Fill your keg with boiling water for 24 hours to swell the oak.
- › Should any small leaks occur after the 24 hour period, repeat the process the next day.
- › Do not leave water in your keg for any extended period of time as the water could stagnate.
- › Empty the water through the bung hole and fill with port.
- › Ensure your keg is at least one third full at all times.
